ANYTHING ELSE WE NEED TO KNOW TO HELP US HELP YOU?

Office Financial Policy

1. If you feel you need some assistance from a family member or parent with making a decision about your care, it is advisable that you bring them with you when the Doctor talks with you about your care.

2. ESTABLISHING A NEW PATIENT FOR SPINAL CARE: The purpose of the consultation is to determine if you have a problem we can help you with, this does NOT imply free examination, x-rays, doctor's reports, and/or check-ups. Fees for service begin with examination, x-rays, doctors' reports, spinal corrections, check-ups, and re-exam's etc. Please note that our fees are updated annually and are subject to change without notice.

3. We are NOT in-network with any insurance provider. At this time our office will send a bill to your insurance company on your behalf for reimbursement for services rendered. It is your responsibility to know if you have benefits for Chiropractic services prior to your appointment if this is of concern to you. This office does not warrant or guarantee that your insurance will pay. Nor does this office promise that an insurance company will or should pay the fees charged. Insurance policies are an arrangement between an insurance carrier and a patient or insured.

4. PAYMENT: All patients are on a cash basis. Payment is due at the time of service unless otherwise noted. This office accepts: Visa, MasterCard, Discover, Cash, and Personal Checks.

5. If the patient is referred to another specialist or discontinues care for any reason other than discharge by the Doctor, the bill is due and payable in full immediately, regardless of any claims submitted.

6. RETURNED CHECKS will incur a $37 service charge. You will be asked to bring cash, certified funds or a money order to cover the amount of the returned check plus the $37 service charge to pay the balance prior to receiving services from our staff or the Doctor.

7. LATE FEES: I understand that after 30 days of non-payment a $37 dollar late fee will be added to my outstanding balance monthly until it is paid in full.

8. COLLECTION FEES: I understand that after 90 days of non-payment for services rendered that my account may be placed with a collection agency and in some instances small claims court, any additional fees incurred due to this will be added to your outstanding balance. This includes but is not limited to late fees, collection agency fees, court costs, interest, and fines. I understand that these additional fees will be my responsibility to pay.

9. PERSONAL INJURY CASES: After coverage and deductible are verified, this office may accept assignment on most policies provided the Insured/Patient signs an appropriate assignment of benefits and or lien (authorizing payment to be sent to the doctor). Waiting for insurance payment is a courtesy and it may be withdrawn under certain circumstances.

10. PERSONAL INJURY or GENERAL INSURANCE CASES: All insurance payments, regardless of which company issues a check first, are applied to your account as long as any balance is due. This means refunds are made only AFTER YOUR BALANCE IS COMPLETELY CLEARED WITH THIS OFFICE. This office will resubmit a claim ONE TIME. We will not enter into any dispute with your insurance company. If coverage problems arise, you will be expected to assist directly in dealing with your insurance company, adjuster, or agent. Any denied or disputed claims will be treated as uncovered services and you will be expected to pay such charges on a timely basis. If you receive any correspondence or checks from your insurance company, you agree to bring these into our office so that we may determine if any action needs to be taken or if the check is an assignment to this office.

11. RESPONSIBILITY FOR PAYMENT: I understand that I am personally responsible for all charges accrued in the office. We reserve the right to charge a $71 fee for missed or no show appointments without 24 hours notice.

12. All care plans that are not completed or if you stop or suspend care, payment for ALL services provided to date is due in full. If a refund is requested it will be reimbursed less any discount given at our standard fees. All care plan visits, re-exams etc,. must be completed in the allotted time stated, i.e. 7 months, 12 months etc. There will be no refund past the allotted time frame. Please note that it is your responsibility to keep up with your appointments.

If you have questions concerning any of the above information or any other matter, please speak with the receptionist or our insurance department prior to seeing the Doctor. We reserve the right to review and update these terms.

I have read and understand the Financial Office Policy and agree to abide by these terms.

Terms Of Acceptance

When a patient seeks Chiropractic Care and we accept a patient for such care, it is essential for both to be working towards the same objective.

Chiropractic care has only one goal. It is important that each patient understand both the objective and the method that will be used to attain it. This will prevent any confusion or disappointment.

Correction: An adjustment is the specific application of forces to facilitate the body's correction of a vertebral subluxation. Our method of correction is by specific adjustments to the spine.

Health: A state of optimal physical, mental, and social well-being, not merely the absence of disease or infirmity.

Vertebral Subluxation: A misalignment of one or more of the 24 vertebra in the spinal column which causes alteration of nerve function and interference to the transmission of mental impulses, resulting in a lessening of the body's innate ability to express its maximum health potential.

We do not offer to diagnose or treat any disease or condition other than a vertebral subluxation. However, if during the course of examination, we encounter non-chiropractic or unusual findings, we will advise you. If you desire advice, diagnosis, or treatment for those findings, we will recommend that you seek the services of a health care provider who specializes in that area.

Regardless of what the disease is called, we do not offer to treat it. Nor do we offer advice regarding treatment prescribed by others. **OUR ONLY PRACTICE OBJECTIVE** is to eliminate a major interference to the expression of the body's innate wisdom. Our only method is specific adjustments to correct vertebral subluxations.

Individual results may vary, depending upon several factors including age of the patient, severity of the condition, severity of the spinal injury, duration of time the condition has been present, the quality of the patients lifestyle, and toxic load. Therefore, we cannot guarantee benefit due to the fact that some patients can have some level of permanent damage that is beyond our control, in spite of our best efforts. All those seeking consultation or care in this office agree not to criticize/condemn UCHCA Boise or any of its employees, associates, or partners publicly (on public forums, blogs, websites, social networks etc.) at any time or for any reason. Furthermore in doing so, I agree to pay for all costs associated with the removal of any and all criticism/condemnation or inflammatory content as noted above.

It is your responsibility to inform this office of any accidents or injuries while under care. As with any healthcare procedure, complications may arise while under chiropractic care, such as but not limited to: stiffness or soreness throughout the spine, rib fracture, disc injuries, muscle strain, cervical myelopathy, etc. Some types of spinal manipulation to the neck have been associated with injuries to the arteries in the neck, thus an association of stroke. The associated risk of stroke is said to be 1 in 2,000,000 cervical adjustments. An association does not mean cause, just like a fireman is associated with fire, it does not mean he caused the fire. A paper published by Ericksen et.al., on upper cervical chiropractic safety noted that out of a multi-doctor career total of 5,085,014 upper cervical spinal adjustments given there was not a single incidence of stroke. We are hereby informing you of these supposed risks if any. The leading cause of stroke is poor lifestyle choices such as long-term sugar abuse, and prescription drug use. Therefore the most likely reason a person may have a stroke while under Chiropractic care is due to their lifestyle choices which are beyond our control, and have nothing to do with Chiropractic. It has been shown by Herzog et.al. that the forces involved with a Chiropractic adjustment are not sufficient to cause injury to the vertebral arteries. As a corollary the forces involved in a whiplash type injury are much greater than a Chiropractic adjustment but we don't see people having strokes following whiplash injuries. Thus, if a patient sees a dentist, massage therapist, personal trainer, or Chiropractor and subsequently has a stroke it does not mean that it was caused by any of these providers, it is coincidental.

All questions regarding the doctor's objectives pertaining to my care in this office have been answered to my complete satisfaction.

I have read and fully understand the above statements. I therefore accept care on this basis.
